Project description:

The overall objective of the project is to facilitate Azerbaijan's connectivity with existing EU customs systems and to provide simplifications for trade facilitation between EU and Azerbaijan.

The Project is divided into three Components:

Component 1: Development of relevant legal framework to be aligned with Common Transit Convention, SAD Convention as well as with further interrelated EU legislation, including the implementation of the Guarantee Management System for transit

Component 2: Support in upgrading existing IT system of SCC taking into account country ICT strategy in order to meet New Computerized Transit System (NCTS) requirements

Component 3: Strengthening institutional and human capacity of the SCC in relation to the application of the common transit procedure and the NCTS system and of the use of the procedure, including integrated system promoted to the target groups.

Expected results:

Main expected results from three Components are:

- SCC supported in development of relevant legal framework to be aligned with Common Transit Convention, SAD Convention as well as with further interrelated EU legislation, including the implementation of the Guarantee Management System for transit;
- IT system of SCC upgraded and met New Computerized Transit System (NCTS) requirements;
- Institutional and human capacity of the SCC strengthened in relation to the application of the Common Transit Procedure and the NCTS system and of the use of the procedure, including integrated system promoted to the target groups.
