Project description:
The ENI SEIS II East project aims to support regular environmental reporting by strengthening environmental governance. The implementation of the principles and practices of the Shared Environmental Information System (SEIS) improves the quality of environmental information, thus contributing to effective and knowledge-based policy making.

Expected results:

- Improved implementation of regional/international commitments related to environmental reporting in line with EU/EEA best practices.
- Improved capacities in the national administrations to manage and use environmental data, statistics and information to support decision-making in line with EU/EEA best practices.
- Preparation of regular State of the Environment reports and indicator-based assessments in line with EU/EEA best practices.
