Project website: emblasproject.org

Project description:
The Project builds on the results of the previous EMBLAS and EMBLAS-II projects to improve protection of the Black Sea environment through further technical assistance focused on marine data collection and local small-scale actions targeted at reduction of pollution by marine litter, public awareness raising and education. The project works with key partners from research/scientific and educational institutions, and civil society organisations.

Expected results:
- Implementation of national and joint regional monitoring programmes.
- Facilitating of joint monitoring and reduction of marine litter.
- Conducting of environmental public awareness and educational campaigns.
