STUDY IN EUROPE

Welcome

Hello

STUDY IN EUROPE

PETER MICHALKO

Ambassador of the European Union
to the Republic of Azerbaijan

We are very pleased to welcome you to this year's "Study in Europe" Education Fair and invite you to immerse yourselves in the world of higher education in the European Union where world-class teaching, top facilities, and cutting-edge research programmes abound.

European higher education institutions have long been popular destinations for students looking to pursue Masters' and PhD programmes. They also offer a vast array of undergraduate programmes, specialised courses, excellent research programmes and facilities, and an educational environment conducive to higher learning. At thousands of universities in the Member States of the European Union, there is an emphasis on the highest level of knowledge and research in natural, social and technical sciences, and on using the most advanced achievements and cutting-edge technologies in all areas, including engineering, sciences, design, information technology and others. This makes the EU one of the world's leading higher education destinations, together with an attractive academic environment and very rich European cultural diversity open to young people.

The "Study in Europe" Education Fair will give you first-hand interaction with higher education institutions' representatives from Europe who can give the best options in programme offerings from nanotechnology and biotechnology to creative industries and digital arts.

Scholarship opportunities will be shared by these representatives as well as the Erasmus+ office in Azerbaijan. You will also have the opportunity to interact with local students and graduates who have returned from studying in Europe so please, feel free to ask questions.

Enjoy the opportunity to learn more about studying in Europe!

Erasmus+

Information about Erasmus+, Erasmus Mundus Joint Masters, the Marie Skłodowska-Curie Actions (MSCA) and the National Erasmus+ Office (NEOs)

Erasmus+ is the European Union's programme for international mobility and cooperation. It provides funding for scholarships that enable students and staff to come to Europe's top higher education institutions. It also funds international Higher education cooperation projects. Erasmus+ provides grants for short-term exchanges for students at Bachelor, Master and Doctoral level to study in one of 33 European Erasmus+ Programme Countries as part of their study programme through International Credit Mobility. Students at all study cycles can go on a physical mobility between 2 and 12 months (or between 5 and 30 days, if part of blended mobility). Erasmus+ also offers the opportunity to combine a period of study in a Programme country with a traineeship to gain work experience.

Erasmus Mundus Joint Masters is another opportunity for non-European students. These are full degree programmes at Master level jointly delivered by an international consortium of higher education institutions. They award full-study scholarships for students from all over the world. Study must take place in at least two of the European Countries.

Find out more about these opportunities here:

erasmus-plus.ec.europa.eu/opportunities/opportunities-for-individuals

The Marie Skłodowska-Curie Actions (MSCA) provide grants for all stages of researchers' careers be they doctoral candidates or highly experienced researchers and encourage transnational, intersectoral and interdisciplinary mobility.

The MSCA enable research-focused organisations (universities, research centres, and companies) to host talented foreign researchers and to create strategic partnerships with leading institutions worldwide.

Learn more about these opportunities: marie-sklodowska-curie-actions.ec.europa.eu/

National Erasmus+ Office (NEOs)

In the third countries not associated to the Programme concerned (Western Balkans, Eastern and Southern Mediterranean countries, Russia and Central Asia), the National Erasmus+ Offices (NEOs) assist the Commission, the Executive Agency and the local authorities in the implementation of the Erasmus+ Programme. They are the focal points in these countries for their stakeholders involved in the Erasmus+ Programme in the area of higher education, vocational education and training, youth and sports. They contribute to improving awareness, visibility, relevance, effectiveness and impact of the international dimension of Erasmus+. More information on the website of Erasmus+ Office in Azerbaijan:
